DESCRIPTORS: \*Nucleotides, \*Nucleic acids, \*Insects,  
Polymers, Polymerization, Separation, Molecular  
weight, Chemical analysis, Genetics, Mice.

A method is proposed for isolating from insects a highly  
polymerized DNA (molecular weight  $1.0 \times 10^6$ ) and this  
DNA is chemically characterized. The nucleotide com-  
position of DNA isolated from *Bombyx mori* L., *Anthe-  
raea pernyi* G. M. and *Musca domestica* L. differs but  
little from that isolated from mice. All the DNA's  
studied belong to the AT-type. (Author)
